

Surviving Cancer Course

Early sign up for *Conquering Cancer*, and online course in Natural Oncology, can be taken for credit at an online accredited university, or without credit directly with Dr. Sircus at a vastly reduced cost.

Conquering Cancer is a standalone self-taught system suitable for both professionals and patients. It offers the most profound all inclusive presentation on cancer ever given. The course represents a sweeping understanding of cancer, its causes and its safe treatment.

Presently I offer three months of unlimited online consultation for 1,200 dollars. The course, without private consultations will be 399 dollars, which will include approximately 700 pages of lessons in text, approximately 50 videos, a thirty day daily email program to get you started (which is centered on breathing retraining and the efforts you need to make there). The for credit edition from an online accredited University in Europe will be approximately four thousand dollars.

Another course called First Consultations, which offers 15 basic lessons in the fundamentals of self diagnosis is also included as well as my HeartHealth meditation system to help one get in touch directly with the power of one's own heart.

The course with private consultations will be offered in three forms. For 699 dollars you get all of the above and an hour and a half of consultations. For 999 you receive three months of unlimited consultations and for 1,400 one has my ear for the duration of treatment, meaning lifetime attention without additional charge. Present cost for that level of commitment is presently 2,400 dollars.

The main purpose of the course is to learn to set up an innovative ICU (Intensive treatment center) in your home and then practice the principles of Natural Allopathic medicine on yourself and loved ones.

Implicit is learning how to treat one's cancer naturally and safely using the strongest natural substances and healing practices know to mankind. This is a teaching program protected under freedom of speech provisions and all the substances used can be legally obtained and used safely in one's own home.

One of the main points in *Conquering Cancer* course is that cancer is something that happens to us in response to intrinsically unhealthy conditions like chronic dehydration and magnesium deficiencies, which makes it much more difficult to eliminate toxins.

We can establish at least 20 causes of unhealthy cellular and bodily conditions that can lead to cancer yet **there is one cause, which all of the other causes feed**, and that is hypoxia, oxygen starvation, which forces cells to ferment and become cancerous,

At home intensive care can mimic ICU treatments with intense oral and transdermal administration of the following healing curative substances and therapies. The full list:

Sun Light

hydrogen

oxygen

carbon dioxide

magnesium

bicarbonates

potassium

iodine

sulphur

selenium

glutathione

Vitamin A, B, C and D

Far-infrared

LED Intense Light Therapy (Near infrared)

Exercises with Oxygen Therapy (EWOT)
PEMF - Pulse Magnetic Therapy
Dr. Boyd Haley's chelator Emeramide
Breathing Retraining
Melatonin
Clay
Probiotics
Medical Marijuana
Kitogenic and Budwig Diets, Intermittent Fasting
Full Hydration
Intense Enzyme Therapy

In *Conquering Cancer* we learn to use these medicines and therapies. When combined they can quickly arrest the spread of cancer. Certainly the protocol can slow cancer down, reverse cancer and even vanquish cancer because they will have a strong stimulating affect on the immune system and on the cell's mitochondria.

These basic therapies and nutritional factors will without doubt lower your chances of dying from cancer unless a death wish is evident. If one continuing to smoke packs of cigarettes each day or continues eating a ton of junk-food and sugar what can one expect out of life and ones cancer treatment?

The above list might seem long, and it is, but many of these substances can be taken in liquid form and some therapies using suggested medical equipment can be done at the same time. We can multitask therapies, which conserves our precious time.

The important point to understand about this list is that they cover basic needs of the body. One clearly increases one's chances of conquering cancer when one increases the range and depth of treatment.

The limit is, of course, what you can afford, what you can import into your country, and what you have time for or can be bothered with. Even if one chooses to administer the entire list, costs for at home treatment is always less expensive than mainstream treatments.

Special Note: The way we think about cancer determines how we will treat cancer or what we will do or not do to avoid cancer. If one listens to the mainstream on the Internet one will learn very fast that everything is a bad idea except surgery, chemo and radiation. Also one will learn that only dangerous tests that increase the risk of cancer are to be used to detect cancer.
